

SUBWAY

BOYNE CITY

Total Rehab. Investment: \$8,000
Indirect Impact: \$9,120
Total Economic Impact: \$17,120

The Michigan Main Street program is an economic development tool based in historic preservation. Focused on the revitalization of traditional commercial districts, the program encompasses four key components: design, organization, promotion, and economic restructuring. Michigan Main Street communities receive facade rehabilitation design assistance from the Main Street architect in order to support rehabilitation projects that will provide a significant impact in the local community. The building at 114 E. Water Street is one of several facade rehabilitations underway or completed in the Boyne City Main Street area. The visual and economic impact of the Main Street approach is evident in the renewed vitality of the traditional commercial district.
